Statement of Upcoming Move of NIC/NLS Services

Within the next few weeks we will be transferring computer services for our ROME, ARPA, and NIC users from the ARC/NIC system to a new system we are installing at TYMSHARE in Cupertino, Ca. The name of this system is OFFICE-1 and is site 53 (oct) when talking to TELNET or site 43 (dec) when talking to a TIP. Currently we are experiencing hardware difficulties on this system, but we and the staff at TYMSHARE are working diligently to solve the problems. Once the hardware is solid and reliable, the above users will have their directories transfered to the OFFICE-1 facility, and receive their NLS power from that site. Watch for upcoming anouncements as to the exact date when your directory will be moved to OFFICE-1.
